

R E M A R K S

Claims 31-60 are presented for examination.

By this amendment, the Abstract has been amended to remove claim language and a marked-up version of the Abstract is provided in the attached Appendix. The specification has been amended to insert headings and to correct grammatical and typographical errors. These changes are included in the attached Substitute Specification, and a marked-up version is provided in the attached Appendix. It is respectfully submitted that the Substitute Specification does not include any new matter and is supported by the PCT Application as originally filed.

Claims 1-30, which are on pages 17-21 of the translation, have been redrafted as claims 31-60 to place them in form for examination in the United States Patent Office and to remove multiple-dependency. It is submitted that claims 31-60 are patentable over the references cited in the International Search Report and the additional references provided in the Information Disclosure Statement.

Respectfully submitted,

 (Reg. No. 24,149)
